Cut Height

Adjustable 10-65mm

Catcher

55 litre fabric

Chassis Type

No rust, cast alloy

LAWNMASTER DISTINCTION

NEW ZEALAND MADE

You know you can trust New Zealand craftsmanship. Easy access to parts and servicing is available nationwide.

STRONG CHASSIS

The true strength of LawnMaster rotary lawnmowers is found in the body casting where the addition of extra material to stress points guarantee longevity. Made from NZ produced primary grade alloy, the LawnMaster chassis won't crack, break or rust.

GREATER PERFORMANCE

Swing back blades protect the engine for maximum longevity while the exclusive LawnMaster aero-catch cutting disc ensures a full catcher in all conditions. Ball bearing wheels add strength and longer life.

BETTER CUT

'Mow Zone' allows you to cut beyond the wheel lines, achieving a superior finish along fences, trees, paths and driveways.

EASY CARE

All LawnMaster rotary models come with an easy access Wash Port that means you can simply clean the underside of the chassis to reduce the build up of dirt.

LARGE CAPACITY CATCHER

Minimise frustrating unloading trips with the large capacity robust high-density plastic catcher.

HEIGHT ADJUSTER

The versatile single lever 10 position variable steel height adjuster is stronger and lasts longer than plastic.

SAFETY

With the self clearing grass flap, all models have the versatility of discharging the grass safely when the catcher is not required.
