Steelfort and Briggs & Stratton have enjoyed a beneficial partnership for 60 years.

As a dedicated engine builder, Briggs & Stratton is committed to providing customers with the best in value performance, durability and customer satisfaction.

For over 90 years, Briggs & Stratton have engineered performance, reliability and exceptional value for money into their air-cooled four-cycle petrol engines. The company is recognised as a world leader in the design, manufacture and after-sales support of engines for lawn and garden equipment.

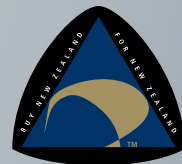

LAWNMASTER TRADITION

Manufactured by Steelfort, a leading New Zealand owned manufacturer and distributor of quality, high performance products, LawnMaster has been New Zealand's most trusted lawnmower since 1946.

LawnMaster employs extensive research and development, innovative design techniques and modern manufacturing methods. This is combined with ongoing market analysis to ensure the products consistently exceed customer expectations and are highly valued. LawnMaster is committed to a programme of continual product improvement.

The Black Champion Series from LawnMaster heads up a contemporary generation of New Zealand made machines, unparalleled in their ergonomic design and technical innovation. This is the essential range of affordable lawnmowers built to master every situation, firmly positioning LawnMaster as the champions of New Zealand lawn care technology.

LAWNMASTER DISTINCTION

NEW ZEALAND MADE

You know you can trust New Zealand craftsmanship and these machines are made specifically with New Zealand lawns in mind. Easy access to parts and servicing is readily available throughout the country, complete with a 2-year comprehensive parts and labour warranty.

STRONG CHASSIS

The true strength of LawnMaster lawnmowers is found in the body casting where the addition of extra material to stress points guarantee longevity. Made from New Zealand produced primary grade alloy, the LawnMaster chassis won't crack, break or rust – ensuring a durable life performance.

SUPERIOR MOTORS

LawnMaster has carefully selected the best motor for the specific set up of the individual machine. The world-renowned Briggs & Stratton engine, the mainstay, is easy to start and provides a reliable performance across a variety of terrains. All engines on the LawnMaster models come with a full two-year warranty.

GREATER PROTECTION AND PERFORMANCE

Swing back blades protect the engine for maximum longevity while the exclusive LawnMaster aero-catch cutting disc and aerodynamic body ensures a full catcher in all conditions. Double ball bearing wheels add strength and longer life to all models.

BETTER CUT

With an enhanced 'mow zone' that allows you to cut beyond the wheel lines, each LawnMaster achieves a superior and thorough finish along fences, trees, paths and driveways.

EASY CARE

To ensure maximum performance, all LawnMaster models come with an easy access Wash Port that means you can simply clean the underside of the chassis to reduce the build up of dirt.

EASY TO START

The effortless and very safe LawnMaster Zone Start System means that you don't have to bend to start your mower.

LARGE CAPACITY CATCHER

Minimise frustrating unloading trips with the large capacity robust high-density plastic catcher.

SINGLE LEVER HEIGHT ADJUSTER

Each LawnMaster comes with a 10 position variable steel height adjuster that is stronger and lasts longer than plastic.

SAFETY

With the self clearing grass flap, all models have the versatility of discharging the grass safely when the catcher is not required.

BLACK CHAMPION

The exciting latest models in the Black Champion range leave all other lawnmower brands far behind. The most obvious advance is with the modern, ergonomically designed and clutter free handle. Powered by the latest Briggs & Stratton ReadyStart engines, they are simply the most advanced lawnmowers you can buy. With four stunning models to choose from, each Black Champion is unique but retains the same set of new innovative extra features that truly sets them as top of their class.

BLACK CHAMPION
